

JOURNEY TO THE LAST PARADISE ON EARTH AND CONSERVE IT WITH US

JOIN THE 1-DAY CORAL GARDENER TOUR
ON OUR RAJA AMPAT VOYAGE

Raja Ampat is the planet's most marine biodiverse place, home to 75% of the world's hard coral species and over 1,600 fish species. Let's keep it that way. We've partnered with The Sea People and their local community to restore the fragile reefs of Yaf Keru. Meet the team, understand ecosystem challenges and conserve degraded corals with two hands-on restoration dives.

Marine Safaris & Island Escapades *with Impact*. Discover more at rascalvoyages.com
