VOYAGES

ESCAPE TO THE RING OF FIRE

Located in the southwest corner of the Pacific Ring of Fire, Indonesia is one of the most volcanically active regions on Earth. Of the country's more than 130 active or dormant volcanoes, the vast majority are located within the so-called Sunda Arc; and this voyage encompasses an extraordinary stretch of that arc between the islands of Sumbawa and Flores - a region of spectacular landscapes that teem with wildlife, both above and below the waves.
